

**Step One:** Upload and activate just like any other Wordpress plugin.

**Step Two:** Click on the "WP QRCode" link in your "Settings" Menu

**Step Three:** Choose any one of SIX QR Code types you want to generate

*Generate QR Codes Below:*

Type

Contact

Name

Company

Phone Number

Email

Address

Website

Memo

Next

\*The "**Contact**" QR Code will add your contact details to the user's phone!

### *Generate QR Codes Below:*

Type

Text

Next

\*The **"Text"** QR Code will display any message you want right on the user's phone!

### *Generate QR Codes Below:*

Type

Phone Number

Message

Next

\*The **"SMS"** QR Code will allow users to send you a text message, perhaps to subscribe to your SMS autoresponder if you use one!

***Generate QR Codes Below:***

Type

URL

URL

Next

\*The "**URL**" QR Code will instantly redirect the user to any website you choose!

***Generate QR Codes Below:***

Type

Email

Email

Next

\*The "**Email**" QR Code will add your email address to the user's phone!

**Step Four:** Tweak the look and feel (Optional)

**Generate QR Codes Below:**

Foreground Color

Background Color

Top Text (optional)

Bottom Line 1 (optional)

Bottom Line 2 (optional)

Size  
 ▼

\*The foreground color is the color of the dots. The background color is the background it's on. The Top Text and Bottom Line 1 and 2 fields will produce the image you see below:

**Step Five:** Right click and Save Image to Your Computer!

Now you can use it on business cards, fliers, newsletters, emails, t-shirts, hats, billboards, etc....

\*\*\*\*\*

We hope this plugin opens your eyes to the exciting world of QR codes and how you can use them for your business.

If you need any assistance, please to contact our support desk.

Now get busy making some QR Codes!
